Hyderabad, India | LinkedIn: linkedin.com/in/sathvikyadav | GitHub: github.com/sathvikyadav0714

Software Developer (Python | Full Stack | SQL)

Data Science undergraduate skilled in Python and SQL, with experience building backend systems, full-stack applications, and machine learning solutions. Focused on developing scalable, real-world systems.

SKILLS

Languages: Python, SQL, JavaScript
Web: HTML, CSS
Frameworks: Flask
Libraries: Pandas, NumPy
Concepts: DSA, OOP, DBMS
Tools: Git, GitHub, MySQL, SQLite, Jupyter, VS Code

PROJECTS

IntelliGrid Pro – AI Energy Analytics Platform

Live | GitHub

- Built AI system for energy prediction, anomaly detection, and cost optimization
- Used XGBoost and Isolation Forest to model expected usage and detect anomalies
- Developed Streamlit dashboard with real-time insights and recommendations
- Implemented cost-loss analysis and "what-if" simulation for energy optimization
- Tech: Python, Pandas, NumPy, XGBoost, Isolation Forest, Streamlit

Campus EventHub – Full Stack Event Management System

Live | GitHub

- Built role-based system with authentication for students and admins
- Implemented event registration, mock payments, and PDF certificate generation
- Designed admin dashboard with event analytics and registration tracking
- Tech: Python (Flask), HTML, Bootstrap 5, SQLite, ReportLab, Git, GitHub

ATS Resume Analyzer – NLP-Based Resume Evaluation System

GitHub

- Built system to analyze resumes against job descriptions using NLP
- Implemented scoring logic and skill-gap identification
- Generated actionable suggestions to improve resume-job matching
- Tech: Python, Streamlit, NLP

EDUCATION

B.Tech in Data Science – Malla Reddy University (2023–2027) | CGPA: 8.0
Intermediate (MPC) – 94.1% | SSC – GPA: 9.8

CERTIFICATIONS

EduSkills – Python Full Stack Internship
Python Bootcamp (Udemy) – Python, OOP, Flask, Automation
JP Morgan – Software Engineering Virtual Experience
Deep Learning Workshop (TensorFlow & Keras)

ADDITIONAL

- Experience building and deploying real-world applications using Python and SQL
- Strong problem-solving skills using Data Structures and Algorithms
